December 8, 2010

Dear Russell and Sustainable Support,

We would sincerely like to thank you and all of the donors who helped you raise £3000 for the Earthship relief project in Port-au-Prince, Haiti. These funds will help send our team to Haiti in January 2011 to install solar power, a water tank, a shower, a toilet and contained water treatment planters on the Earthship Demonstration project at the Grassroots United compound. The project will provide paying jobs for local Haitians to learn how to build Earthships and their self-sufficient systems. The project will also provide lunches for the Haitian workers.

Your funds will go a long way towards achieving these things. The completed unit will serve as a demonstration module for future autonomous villages in Haiti.

Thank you one and all. We are inspired by your efforts.

Best wishes,

Michael Reynolds
Earthship Founder
